

## Cumulative Keyword Index

The index includes major journal articles, bibliographies, fieldwork reports, lists of associates, lists of institutions, discussion and criticism, problems in fieldwork, Scholars as People, terminology, Viking Fund Medalists, Viking Fund Publications in Anthropology, and indexes.

The index contains a consolidated alphabetical listing of keywords, authors, and commentators. For example, *acculturation* appears with the abbreviated code 60 45, which refers to an article published in 1960, beginning on page 45. At this point, the user has two options:

(1) If he wishes more detail before actually going to the journal, he will look in the chronological listing under 1960 for the article beginning on page 45. There he finds additional information about the article. If he is familiar with the article and wishes to go no further, he

may repeat the same procedure for other references to *acculturation*.

(2) The user who is looking for any and all references to *acculturation* may note the reference code, and by-passing the chronological listing, go directly to the journal issue.

The user is cautioned to consult the index carefully for possible alternative listings. Also names may appear in many different forms, all of which are meaningful. For example, *Juan Comas* appears in these forms: *Comas J* (used for author cards), *Comas\* J* (used for commentators), and *Comas-Juan* (used for keywords).

This year's index includes keywords selected by the authors as well as those selected from the first and last paragraphs of articles and from titles and section heads.

Key to symbols used in the index are listed below.

- + When used between two items in a keyword phrase, a plus symbol represents an ampersand and is read as "and." When used at the end of a keyword, a plus symbol indicates that a word has been shortened or cut off for space.
- Two words separated by a dash must be read together to be understandable.
- = This indicates the end of the title of an article.
- \* When used after a name, an asterisk indicates a commentator.
